

The logo features the word "BLACK" in white, "B" in red, a white diamond-shaped icon with internal lines, and "X" in red. A white chevron points to the left of the text. The background is a server room with blue and orange lighting, overlaid with a large red diagonal stripe and a grey semi-transparent triangle.

BLACK B  **X**[®]

A trusted digital infrastructure partner

April 2025

Introduction

Corporate overview

Black Box is a global leader in digital infrastructure solutions, delivering network and system integration, managed services, and technology products to Fortune 100 and top global enterprises. With a presence across the United States, Europe, India, Asia Pacific, the Middle East, and Latin America, Black Box serves businesses across financial services, technology, healthcare, retail, public services, and manufacturing.

Supported by a global team of around 3,600 professionals and strategic partnerships with leading technology providers, Black Box delivers end-to-end solutions in network integration, digital connectivity infrastructure, data center buildouts, modern workplace solutions, and cybersecurity. Its Technology Products portfolio enhances business operations with cutting-edge solutions in AV, IoT, KVM, Networking, Infrastructure, and Cables.

Black Box is a premier **Global Digital Infrastructure Solution Integrator** with a strong track record

- ◆ Major delivery centers across Mumbai, Delhi, Bengaluru, Kolkata, UP, Rajasthan, Andhra Pradesh and Kerala

Introduction: Black Box team

Sanjeev Verma
President & CEO

Seasoned technology veteran with over three decades of experience in ICT sector

Jayantha Prabhu
Business Head – India & SAARC

28+ years of experience in the Technology domain, driving innovation to transform various businesses

Abhinav Sharma
VP & Head – Sales, India & SAARC

Sales leader with 25+ years in enterprise communications and strategic operations

Rajat Varma
Vice President – West Region, Sales

Experienced IT professional with 20+ years in leadership, sales, alliances, operations, technology, and team building

Yadvinder Singh
Associate Vice President – East, Sales

Proven sales leader driving growth, innovation, and digital transformation across SAARC

Partha Sarathi Dash
Associate Vice President – South, Sales

Leads customer-focused sales growth through strategic enterprise and IT solutions

Sanjay Ahlawat
Associate Vice President – North, Sales

25+ years leading IT sales, design, delivery and regional operations

Tomi Thomas
AVP & Practice Head – Modern Workplace

24+ years of expertise in AV consulting, design, and collaboration solutions

Bhavin Barbhaya
Vice President – Networks, India

25+ years leading sales & solutions in enterprise tech, driving growth across India & APAC

Sasikumar R
Associate Vice President – Service Delivery, India

28 years of expertise in service delivery, projects, and customer excellence leadership

Customer-first evolution of best practices

Global Support

- Global Response Centers
Plano, Pittsburgh, Mumbai & Bengaluru
- Customer Experience Centers (CEC)
- Global Security Operation Centers (G-SoC)
Plano, Bengaluru, Sydney & Mumbai

Quality Commitment

- ISO 9001:2015 certified
- ISO 20000:2018 certified
- SOC-2 certified
- BICSI certified team members
- RoHS2 compliant
- WEEE compliant

Continuous Innovation

- Hyperscale Data Center of Excellence in Minnesota, US
- Bengaluru Center of Excellence for Global Solutions Integration
- State-of-the-art incubation centers to align products to newer markets

Expertise built over decades

Relationships

Fostering deep relationships with our technology partners, directed towards helping our customer succeed

Relevance

Understanding industry landscapes, gauging business futures, securing IT, and aligning the relevant technology from global leaders

Results

Leveraging more than 48 years of dedicated efforts towards delivering objective results aligned to the larger customer organization, but driven by technology

ESG at Black Box: Driving a sustainable future

Driving a **transparent**, **sustainable**, and **globally-compliant** ESG strategy rooted in responsible, future-focused business practices.

ESG Achievements & Recognitions

BRSR disclosure submitted

Crucial CDP rating obtained

Sustainability report published

EcoVadis rating obtained

SBTi Net-Zero commitment reported

Our Goal

Black Box's ESG commitment drives responsible growth, shaping the organization, strengthening the business, and elevating the brand through global standards and meaningful environmental and societal impact.

Education

Health

Environment

Corporate Social Responsibility (CSR)

Driving meaningful change through active participation from both our organization and employees.

Industry & market accolades

2024

- ◆ Extreme Networks – India Partner of the Year 2024
- ◆ Juniper Networks – Worldwide GSI AIDE Partner of the Year 2023
- ◆ Best Organization (IT & ITes) - Corporate Titan Awards (India)
- ◆ Most promising Managed IT Services Provider - CIO Review (APAC)
- ◆ Unify US Partner of the Year - Mitel
- ◆ Sound and Video Contractor 2024 Innovative Product Awards - Emerald DESKVUE with AV WALL (EU)
- ◆ Verizon – Wireline Subagent of the Year, 2023 (USA)
- ◆ Commscope – Partner of the Year '23 (LATAM)
- ◆ Verint - Partner Excellence Award 2023 (India)
- ◆ Emerald AV Wall for Best of Show at ISE 2024 (EU)
- ◆ 'Outstanding Corporate Tax Management' at the 7th Tax Strategy and Planning Summit & Awards 2024 (India)

2023

- ◆ Extreme Networks – India Partner of the Year 2023
- ◆ Juniper Networks - MIST-AIDE Partner of the Year (India)
- ◆ AV Technology Best of Show ISE 2023 for Emerald DESKVUE (Global)
- ◆ Platinum Award - Best Booth – Automation Expo 2023 (India)
- ◆ Juniper – Alliance Partner of the Year (APAC)
- ◆ Most Promising Tech Marketers Award 2023 from The Economic Times, India

2022

- ◆ Extreme Networks – India Partner of the Year 2022
- ◆ Juniper Networks - MIST-AIDE Partner of the Year (India)
- ◆ Juniper Networks - Enterprise Partner of the Year (India)
- ◆ Top choice in the Disability Equality Index® Best Place to Work for Disability Inclusion (USA)
- ◆ CommScope - 'Focus on Training' Award (USA)
- ◆ Silver Stevie Award Winner Customer Service Team of the Year (USA)
- ◆ TVB Europe Best of Show Award IBC 2022 (EU)
- ◆ AV Technology Best of Show ISE 2022 (EU)
- ◆ Verint - Partner Excellence Award (India)
- ◆ Avaya - Subscription Partner of the Year (India)
- ◆ National Best Employer Brands — 2022 (India)
- ◆ TVB Europe 'Best of Show' Award at IBC 2022 (EU)

Global Solutions Integration

We provide end-to-end digital infrastructure solutions and services

1

Intelligent infrastructure

- Fiber connectivity
- IoT, Physical security and surveillance
- Passive infrastructure & structured cabling

2

Enterprise networking

- Local & wide area networks
- Cloud networks
- Wireless and private LTE networks

3

Modern workplace

- Customer experience
- Advisory and consulting services
- Employee experience

4

Data centers

- DC infrastructure
- DC support services
- Network and connectivity

5

Cybersecurity

- Advisory & GRC
- Infrastructure & data security
- Managed XDR & IAM

Managed services

- X-as-a-service
- Service desk
- Support services
- Augmenting staff

Professional services

- App development & integration
- Field & dispatch services
- Project deployment
- Consulting & design

Through our **enterprise networking solutions**, we deliver high-performance, secure, and scalable connectivity

Core Networking

SD-WAN

Secure, high-performance connectivity across distributed locations with centralized control

Wi-Fi 6/6E/7

Ultra-fast, low-latency wireless designed for high-density, mission-critical environment

Security/NAC

AI-driven threat prevention & Zero Trust network access for enhanced security

Core Routing & Switching

Scalable, resilient networking to support AI, automation, and edge computing

Private LTE/5G

Private & Shared Spectrum

Dedicated, high-bandwidth wireless for secure, real-time operations

Private LTE/5G Network and Edge Devices

Industrial-grade connectivity for seamless mobility and automation

IoT/RTLS & Asset Tracking

Real-time location tracking and IoT integration for efficiency and security

Neutral Host

Shared wireless infrastructure that enables multiple carriers to provide seamless coverage

Distributed Antenna Systems

Licensed Spectrum

Reliable, high-capacity connectivity for enterprise and industrial environments

In-building Cellular

Seamless mobile coverage inside large, complex facilities

Public Safety

Mission-critical communication solutions to meet regulatory & safety requirements

Key Strategic Partners

CORNING

Through our **modern workplace solutions**, we transform employee and customer experiences

Employee Experience

Agentless Service Desk

AI-powered automation for instant issue resolution without human intervention

Global Concierge Service

24/7 personalized IT and technology support, tailored to workforce needs

Employee Enablement

Cloud-based tools and training to empower employees for seamless productivity

Modern Collaboration

AI-enhanced communication and meeting solutions for a hybrid workforce

Sustainable DaaS

Cost-effective Device-as-a-Service model for efficient lifecycle management

Tech Cost Management

Optimized IT investments through automation and data-driven insights

Customer Experience

Channel-less CCaaS

AI-driven cloud contact centers for seamless omnichannel interactions

Agent Assist & AI Automation

Virtual agents and AI-powered automation to enhance service efficiency

WFM & Quality Assurance

Intelligent workforce management and performance tracking

CRM Application Services

Optimization and automation of CRM platforms for better engagement

Deployment Services

- Site surveys, standards and run book creation, on-site training
- Network & site readiness assessment
- MDF/ IDF build out/ rehab & network remediation/ future-proofing
- New fab build-out & fab support facilities

Customer Support Services

- 24x7x365 response center
- Remote diagnostic support
- Proactive monitoring
- End user service desk
- Incident and performance remediation, etc.

Maintenance Services

- Preventive maintenance
- Break-fix support
- On-site & remote troubleshooting, end-of-life support & decommissioning, etc.

Staging & Logistics Services

- Device lifecycle management
- Inventory tracking, RTLS
- IT asset tracking & management
- Configure, deploy & manage wired & wireless devices, etc.

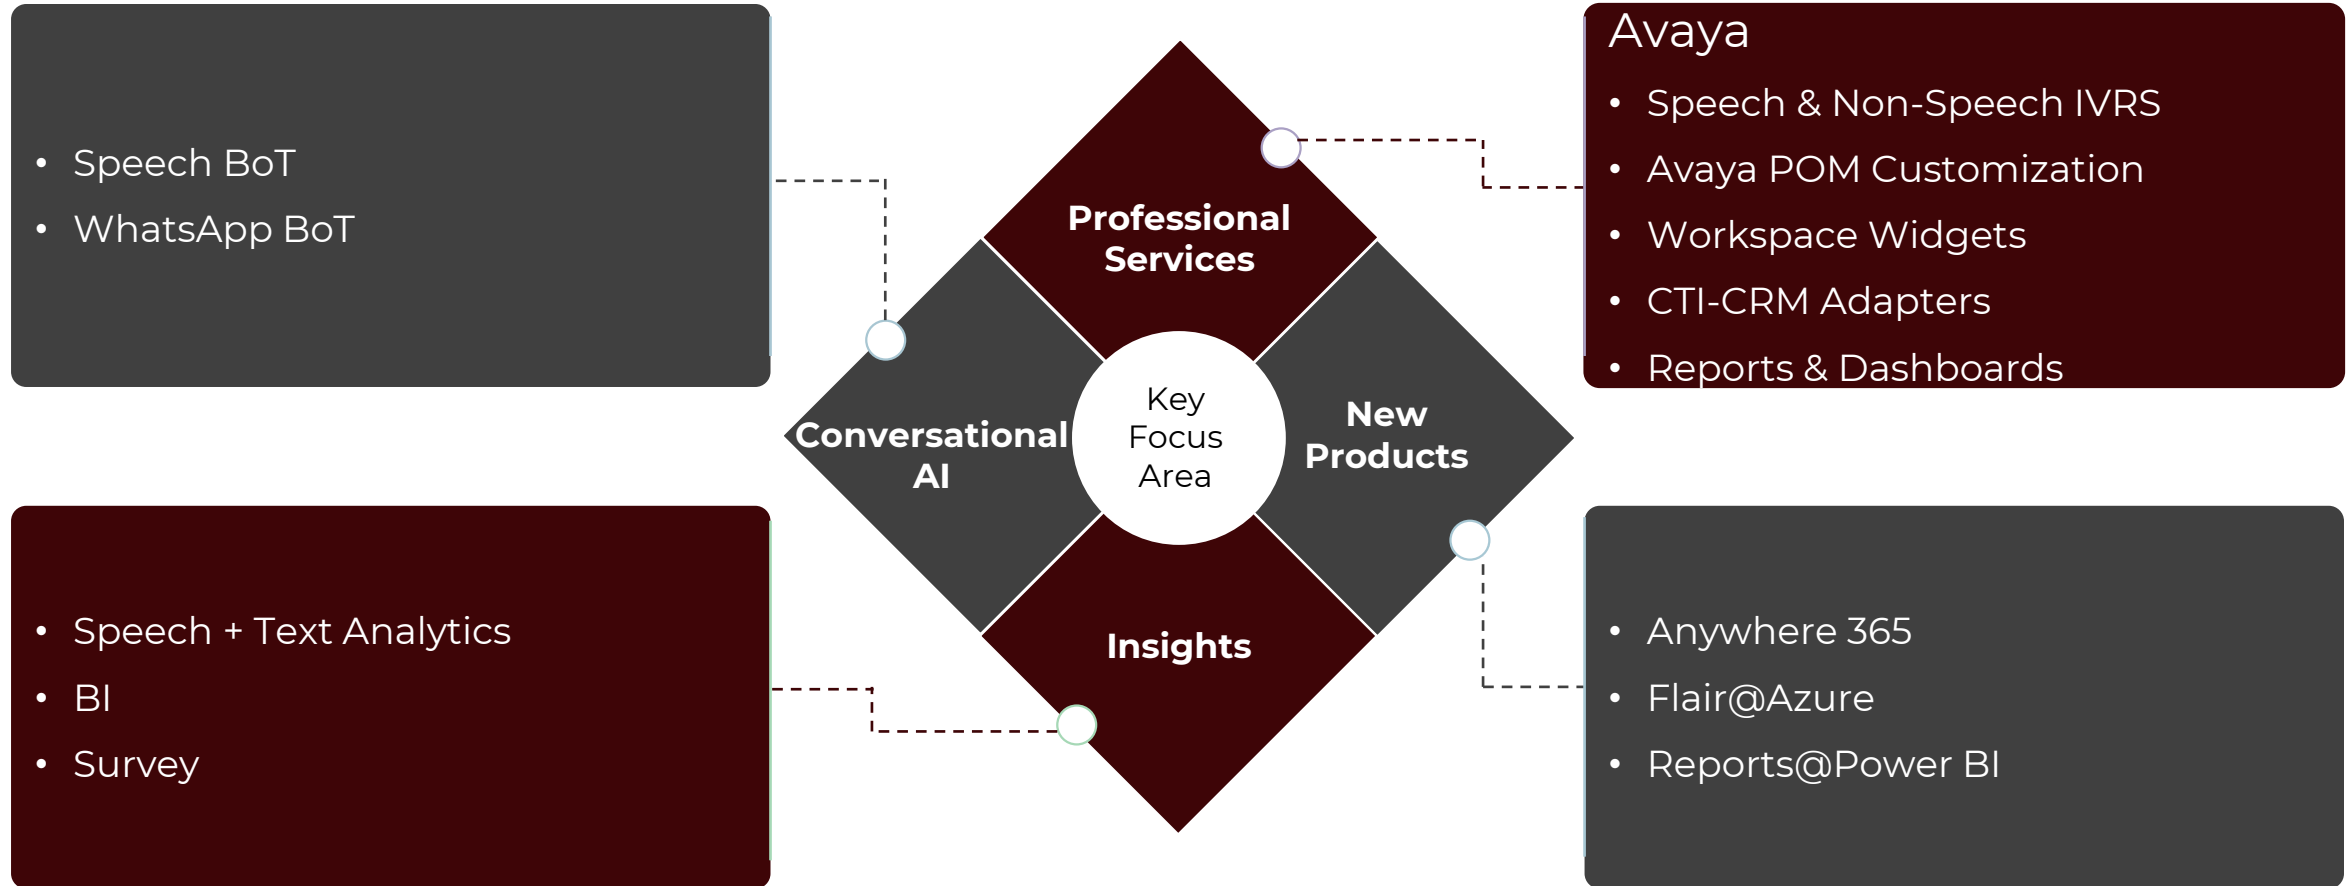

Remote & Operational Services

- Backup management
- Carrier incident managed services
- Vendor management services
- Disaster recovery planning, etc.

Case Studies

Case study: Black Box has been providing digital infrastructure services to a global semiconductor company for over a decade

Client context

One of world's largest semiconductor design and manufacturing companies was facing key challenges including ...

Lack of consistency, quality and accountability across all locations

Identifying a partner that can deliver world class services in multiple complex and challenging environments

Transitioning from complex construction environments to sustainable and productive production environments

How did Black Box help

Black Box provided on-site full-time staff at all major US campus with additional on-demand support for regional locations

Design, deploy and support solutions in labs, offices, clean room manufacturing facilities and data centers

Actively engage in new construction, supporting client's expansive portfolio of general contractors delivering new build and facility turn-up

“

“The Black Box team functions like an extension of our team. The badge color may be different, but they perform like one of us! They care about the outcomes and work to make sure we are meeting our timelines and are hitting our goals. Kudos to the entire Black Box team here in Santa Clara!”

“

“Black Box 24X7 factory support team is invaluable. They spun up the support team on short notice and continue to exceed the 30-minute SLA. They focus on proactive problem resolution to eliminate potential down time”

Case study: Black Box successfully completed one of the first AI datacenter builds

Client context

Large hyperscale client's first AI datacenter in the US; remote location with key challenges including ...

- > Lack of adequate labor, and a unionized environment..

- > First full campus release by customer: ISP/OSP for 3 buildings within same project scope, with very tight timelines

- > Strict public safety DAS compliance requirements from AHJ¹ in the region

How did Black Box help

- > Black Box partnered with 5 subcontractors to stand up a unionized team in record time

- > Designed and deployed cabling simultaneously throughout 3 buildings across site

- > Used a parallel deployment approach to maximize efficiency, and re-sequenced the scope during preconstruction

Solutions

Specialized OSP Cable Laid

3456 OSP cabling installed in simultaneous fashion across 3 buildings in project

References

“The Black Box team worked until nearly midnight finding the issue [connectivity issue caused by animal chewing through cable], mobilizing specialized support resources, and restoring full traffic handling functionality. It was yet another instance of Black Box demonstrating what great partnership looks like.”

“The data point that perhaps best testifies to the quality of the work performed is the near complete absence of cabling issues. Thousands of individual connections worked flawlessly.”

1. Authority having jurisdiction

Case study: Leading microchip manufacturer enlists Black Box to streamline operations, reduce costs and increase profits

Client context

One of the world's largest microchip manufacturing companies was facing key challenges including ...

Limited technical resources, thus lack of consistency and quality across 5 campuses globally

Needed a way to easily access etching machines used in wafer manufacturing around the world

Instead of traveling to fabrication areas, executives sought a virtual solution to monitor and maintain machines remotely

How did Black Box help

Black Box enabled remote access, monitoring, and maintenance of fabrication machines via Virtual Network Computing (VNC) protocol

Black Box's Emerald® IP KVM SE with VNC firmware was tested and approved for global deployment

The deployment equipped thousands of etching machines with IP KVM transmitter connections, allowing remote command and control

Estimated \$7M in annual savings; continues to grow as project scales

66%

Reduction in Costs

Company decreased maintenance time by an estimated 66% compared to previous method

References

“

Black Box was the only company that delivered a working VNC firmware solution. Their responsiveness throughout development, testing and implementation set them apart.” –**Manager, Microchip Manufacturer**

Case study: Black Box ran a multi-site distributed antenna systems (DAS) program for a hyperscale client

Client context

A large hyperscale client was looking for a **consistent and programmatic** partner for public safety DAS and cellular connectivity, with key challenges including ...

- > Lack of a reliable partner with ability to deliver a standardized solution across varied sites

- > Need for a vendor that could supply both DAS variations

- > Remote site locations with varying AHJ¹ regulations

How did Black Box help

- > Assisted the client in creating their baseline standard DAS designs for both Public Safety and Commercial Wireless

- > Revamped client's oldest DAS infra and took over in cases where other vendors failed/closed-down

- > Leveraged elite partnership with OEMs to meet client timelines and quality standards

Solutions

Design and installation

Testing and commissioning

Day2 support

Value Delivered

80+

Separate projects including 48 currently on-going for the client

50+

Buildings positively impacted across 15+ campus locations

10+

Experts in the field deployed to meet client's increasing needs, including highly certified design & field engineers and managers

References

“

Black Box was able to seamlessly take over when another vendor/integrator closed down allowing the Customer to still meet legal deadlines and occupy buildings that required DAS for Certificates of Occupancy

“

Black Box played a crucial role in mitigating significant risks on our Wireless projects in 2 recent situations. One of these involved a risk to our Public safety builds wherein another vendor had failed to procure an essential equipment and Black Box came to our rescue by sourcing the same

1. Authority having jurisdiction

Case study: Black Box enables network modernization for an online pharmacy

Client context

Consumer healthcare SuperApp that provides consumers with to a wide range of pharmaceuticals, healthcare products, diagnostic test services, and teleconsultations

- > Need to overhaul its infrastructure

- > Existing setup suffered in performance, reliability security and scalability.

- > Network was not prepared for future expansion needs

How did Black Box help

- > Black Box helped set up a 2-tier LAN, featuring Juniper switches for core, access, server farm, and WAN connectivity

- > To enhance network performance and facilitate quicker issue resolution, implemented Juniper Mist for wired and wireless network

- > A passive network from CommScope was deployed.

Solutions

Enterprise Networking

Value Delivered

Juniper's Mist AI enables operators to achieve significant time and cost savings through expedited problem resolution and reduced need for onsite visits.

Users experience the advantages of a network infrastructure that is more consistent, dependable, and quantifiable.
