

# Black Box Structured Cabling & Infrastructure Services/Capabilities

## Plan for Future Success Today

Black Box can help you plan and execute a structured cabling system and network infrastructure that gives you a flexible growth model, regardless of what applications the future brings.

A smartly designed structured cabling system and infrastructure will enable transformation at the intelligent digital edge now and for many years to come.

## Partner with a Pro

When you partner with Black Box, you partner with the pros—a deep staff of BICSI-certified techs and engineers, RCDDs, certified project managers, and techs with manufacturer certifications.

With our national and international footprint, we're everywhere you are. We can design, deploy, and manage the most demanding structured cabling system and network infrastructure at one site or 100s of sites around the world.

## Black Box Partners

The Black Box portfolio includes best-in-class solutions from today's leading structured cabling and infrastructure manufacturers. Our deep partner relationships and certifications help us deliver services and solutions that use the latest innovations and technologies.

### Partners include:

- Commscope
- Corning
- Panduit/General Cable

All Other Leading Manufacturers

## Comprehensive Structured Cabling and Infrastructure Services

Whether you're planning a new facility, are investing in an infrastructure upgrade, or want support services, Black Box is the only partner you need. Our end-to-end capabilities, deep technical expertise, and global footprint enable us to handle everything from large-scale rollouts and rapid deployments to on demand, day 2, short-term, long-term, and custom services. With our national and international footprint, we're everywhere you are, at the right place, at the right time, and with the right resources.

### Structured Cabling and Infrastructure Services

Comprehensive start-to-finish services from planning through deployment including data centers and facilities worldwide. Our services connect a variety of technologies to support the intelligent digital edge as well as management of the full life cycle of the project.

### Managed Edge Services

From discovery and assessment through management to on-site support, our fully custom services deliver results. You tell us what you need and we'll deliver.

### Maintenance

Comprehensive on-site and remote support to make your IT work everyday, everywhere.

### Field Services

With more than 2,300 specialized technicians managing 12,000 deployments in North America in the last year and with staging points all over the world (US, Latin America, Europe, Asia), our teams drive digital transformation around the globe.
