

Top 8 reasons to use CBRS Private LTE in Warehousing and Logistics

1

Maximum Uptime

Interference-free operation enables your systems unparalleled processing speeds.

2

Uninterrupted Mobility

Access points automatically configure client devices for optimized roaming. Dropped connections are virtually eliminated.

3

Extended Coverage

Access points experience up to 10x better coverage. The result is faster ROI, more sparse installation, and trouble-free service areas.

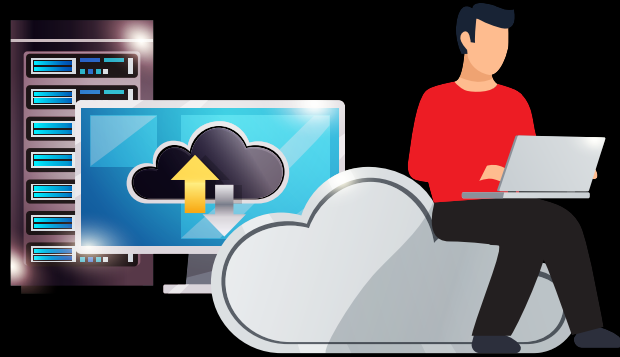

4

Optimized for Outdoor Coverage

CBRS works just as well outdoors and indoors. Each access point allows extended ranges up to one square mile, equating to significant decreases in structured cabling.

5

Cloud Powered

The synthesis between cloud networking and cellular wireless allows enterprise IT teams to access, manipulate, and repair the system with zero hassle.

6

Digital Automation Multiplier

Process and security cameras, IoT sensors, and robotic automation are enabled like never before. With potentially thousands of connections, your automated productivity is essentially unlimited.

7

Crystal Clear Audio

Voice Over IP and Push-to-talk experiences the highest levels of coverage and predictable quality. Hear yourself as never before with realistic audio quality and unparalleled reliability.

8

Seamless Integration

Existing enterprise infrastructure will intermingle with your mobile network equating to the most trouble-free, reliable, and powerful IT structure imaginable.
