BLACK BOX®

Wi-Fi as a Service
## Positive IT Outcomes

Give Your Old Wi-Fi Network New Life

- Nearing end of support? Upgrade to next generation Wi-Fi 6
- The typical refresh cycle is 4-7 years
- End-of-life switches are easily updated

Ease-of-use and Error Remediation Update

- Resolve network reliability issues better than ever before
- Leverage AI to identify & remediate access switch configuration errors

Improved Expandability

- Seamlessly add new locations, buildings, floors
- Automate access switching to reduce errors and simplify operation and maintenance

A Transformative Impact Across the Board

- Transform experiences for employees, guests, customers
- Implement indoor wayfinding
- Implement location-based notification
