

AV Solutions

Creating connected, immersive spaces that fuel collaboration.

Today's agile work ecosystems foster flexible, productive environments that utilize space differently. Collaboration spaces have taken center stage in hybrid work ecosystems merging people, culture, and engagement. Found in conference rooms, waiting rooms, lobbies, and huddle spaces, today's collaboration spaces feature the latest audio video technology to integrate people and spaces and create employee-centric workflows. Successful AV solutions harmonize in-room and remote collaboration experiences and enable everyone to discuss, present, and share ideas as one and with no barriers.

AV & Collaboration Expertise

Skilled and certified engineers design today's complex audio, video, and collaboration solutions that integrate seamlessly with your communications platform and give users extraordinary, reliable, consistent experiences.

World-Class Project Management

Expect personalized, professional project management services from the same team starting with procurement and staging to installation and support. We'll take care of all the details, so you can focus on your business priorities.

Consistent AV Services — Everywhere You Are

Our field technicians are certified to handle your unique deployment needs at one site or hundreds of sites. Expect the same performance and the same results any and everywhere from New York to LA.

Services from Day 2 and Beyond

The project doesn't end with "handing over the keys." Layer on essential services, like monitoring and remote resolution to keep your system running smoothly. When remote technical support won't suffice, we provide critical on-site support.

The New Vision for the Office

As companies redefine and redesign their work ecosystems and workspaces, AV technology is more than a communications facilitator. It is now a business-critical technology affecting every aspect of how we work and interact in-person and virtually.

72% Percentage of American execs planning to invest in new virtual collaboration tools to support hybrid work.¹

50% More than 50% of companies plan to pilot new workspaces as their companies shift to a hybrid model.²

66% Percentage of leaders considering redesigning office space for hybrid work.³

10+ People
Any gathering with more than 10 people should be virtual for the near term.⁴

Customer Success Stories

Driving Sales with Interactive In-Store Signage

A nationwide retailer needed a digital signage solution that would display in-store advertising featuring new products and up-and-coming trends. To give customers more product details, the solution needed to be interactive with mini touch-screen displays. We created the solution, deployed it in more than 80 stores, and followed up with post-installation support services.

7 Trends in Post-COVID AV

How AV is Shaping the Hybrid Workplace

Here are the seven trends in AV technology that are shaping and changing the hybrid workplace and how teams work safely and efficiently.

- The Death of the Cube Farm
- Digital Signage
- Touchless Technology
- Occupancy, Environmental, and Health Sensors
- Scheduling Systems
- Seamless Room/Zoom Experiences
- Intuitive Technology
